- Fast coverage
- **Grip-Tex Textured Weather Max Panel**
- Better Appearance
- Glare Resistant (Better color appearance/Consistency)
- Better Traction/Grip for installers
- Same Warranty as Standard (smooth) Coating
- Better Scratch Resistance
- Hides under decking imperfections

The Weather Max panel is our newest 28 gauge offering. Custom built from the ground up, this panel offers low cost, with the appearance of standing seam. Our 28 Gauge Weather Max panel is made from thicker .016 steel and is available in a large amount of in stock colors, and can be quickly produced. The panels are cut to the specific length that is required, and then bundled with any trims that are needed, and delivered to the jobsite. We specialize in bending any custom trim or shape that you might need for your project. Contact us today and discover how affordable metal roofing can be.
